# Operations: New / Upcoming

| Topic                        | Benefit  | Comments  |
|------------------------------|--|---|
| Data Placement               | Optimization of storage resources.<br><br>(e.g. efficient utilization of EOS based on xrootd monitoring)   | Based on data popularity tools; collected metrics need to be analyzed and mechanisms for data replication proposed. |
| Data access                  | Transparent access to remote and shared Tier1 storage. Would improve the job efficiency and performance in remote data access.   | WNs on the OPN. Could then extend to other sites.   |
| Common Analysis Framework    | Operate / maintain distributed analysis system common to ATLAS and CMS. Consolidation of Pilot technologies. Discussion on operational aspects planned on 31st Jan 2013. | Based on PAnDA and GlideINWMS.  |
| Cloud infrastructure testing | Leveraging IT Expertise on Agile Infrastructure to commission additional computing. Establishing de facto standards.   | Using experiments workflows/services.   |

# Active Task Forces

- CVMFS deployment
- gLExec deployment
- SHA-2 migration
- perfSONAR deployment
- Tracking tools evolution
- FTS 3 integration and deployment
- Squid monitoring
- Operational aspects of xrootd deployment

List of 11 Tier2 sites who did not respond to the task force

| Site                     | VOs              |
|--------------------------|------------------|
| BG01-IPP (BG)            | ATLAS, LHCb      |
| egee.irb.hr (HR)         | LHCb             |
| egee.srce.hr (HR)        | LHCb             |
| INDIACMS-TIFR (IN)       | CMS              |
| INFN-CATANIA (IT)        | LHCb             |
| INFN-MILANO-ATLASC (IT)  | LHCb             |
| INFN-TORINO (IT)         | ATLAS, LHCb      |
| INSU01-PARIS (FR)        | LHCb             |
| NCP-LCG2 (PK)            | CMS              |
| ru-Moscow-SINP-LCG2 (RU) | ATLAS, CMS, LHCb |
| WISC-ATLAS (US)          | ATLAS            |
