

HEPiX Spring 2013 Workshop

Contribution ID: 1

Type: **Presentation**

Wigner Data Centre

Monday, April 15, 2013 2:00 PM (25 minutes)

The CERN remote data centre in Budapest is now in operation, the first equipment deliveries have taken place and the network infrastructure, including the 1x100Gbps links is operational. By the time of this talk the first systems should also be in operation. This talk will therefore summarise the project since the last talk at the HEPiX spring meeting of 2012 and the experience gained so far.
