Virtualisation & Cloud Developments at RAL Tier 1

Thursday 18 April 2013 09:25 (25 minutes)

The RAL Tier 1 has been making increasing use of virtualisation to provide a platform for development and increasingly production services. More recently we have a stablished a private cloud platform using StratusLab which is now being used extensively across the Tier 1 and the STFC Scientific Computing Department. This talk will discuss the current status and roadmap for the immediate future.

Author: COLLIER, Ian (UK Tier1 Centre)

Presenter: COLLIER, Ian (UK Tier1 Centre)

Session Classification: Grids, clouds, virtualisation

Track Classification: Grid, cloud and virtualization
