SCCM 2012 SP1 : New features and implementation at CEA/Saclay IRFU

Tuesday 16 April 2013 14:00 (25 minutes)

The IRFU use the Microsoft product SCCM (System Center Configuration Manager) to manage all his Windows computers (1500 computers). SCCM manage the network installation, inventory, product installation and update, security patches ...since the 2003 version.

The 2 last releases of this product (SCCM 2012 in april 2012 and SCCM 2012 SP1 in January 2013) give us new possibilities. In particular the SP1 support now Windows 8 and also include a client to manage for Mac clients and Linux Clients.
