

HEPiX Spring 2013 Workshop

Contribution ID: 35

Type: **Presentation**

The HEPiX IPv6 Working Group

Wednesday, April 17, 2013 11:10 AM (25 minutes)

This talk will be an update on the activities of the IPv6 working group since the meeting in Beijing. CERN has now announced that they could run out of IPv4 addresses during 2014 so this has resulted in increased pressure on our activities. The working group has more active participation from the LHC experiments; we are also seeking out more WLCG Tier 1s and Tier 2s. Data transfer tests continue on our own testbed but we are now planning a phased set of tests on subsets of the WLCG production infrastructure.
