

QBBC

- QBBC differ from other reference Physlists:
 - No .icc file .cc instead
 - No template for SetCut method
 - Different style of hadron inelastic physics builder
- Hadron inelastic
 - One class using inheritance of G4VHadronProcess
http://www-geant4.kek.jp/lxr/source/physics_lists/lists/include/G4VHadronPhysics.hh
 - Small number of lines of code
 - Cross sections and final states decoupled
 - Builders are needed for FTF and QGS
 - No code repetition – G4VHadronProcess serves
