About EPJ

The European Physical Journal (EPJ) is a series of peer-reviewed journals covering the whole spectrum of physics and related interdisciplinary fields. EPJ is committed to high scientific quality in publishing and is involved in all main citation databases.

FAQ

Colour figures:

By default, figures appear in colour online and low in print. Therefore, reference to colour coding in both electronic and print versions should be avoided unless it is necessary for the description of a figure. If the journal's authors would like to have their figures in colour in print as well, the journal will charge a flat fee of EUR 600 (+VAT) per article, without any limitation on the number of colour figures in that article.

Language:

Only articles in English are accepted for submission. The language must be sufficiently clear to allow for the effortless understanding of the scientific content, otherwise the manuscript will not be considered further by the editorial board. If an author repeatedly submits the same manuscript without significant improvement in the basic clarity and readability of the presentation, the manuscript will be rejected. Submission of manuscripts on political grounds. Language polishing of an already accepted paper is provided by the journal as part of its basic services.

Full-text access:

If you experience problems in accessing the full texts of the journal, please follow the instructions on <http://www.epj.org/priceaccess.html>.

Contact in case of technical problems/questions:

In the pull-down menu of the individual EPJ section on the main portal page you will find the contact details for the editorial and production offices.

Contact concerning the editorial policy or to propose a topical issue:

Please contact the respective Editorial Office with a detailed proposal. For contact details, please click on "Editorial Board" in the pull-down menu of the corresponding EPJ section on the main portal page.

Open Access:

About EPJ

The European Physical Journal (EPJ) is a series of 100 journals covering all areas of physics. EPJ is the most cited journal in physics, with over 250,000 citations per year. The EPJ family of journals is the largest and most diverse collection of physics journals in the world, reflecting the breadth and depth of modern physics research.

Scientific Advisory Committee

Since January 2006, a Scientific Advisory Committee has been responsible for the activities of the journals and their editors in that area. The committee consists of a group of experts from various fields of physics and mathematics, and plays a major role in the editorial process of the physical journals. The committee's main tasks are to advise the editors on the development of the journals, to promote the exchange of information between the various journals, and to ensure that the journals are representative of the field.

Open calls for papers

The Scientific Advisory Committee meets once a year and is responsible for the overall direction of the journals. The members of the committee are listed below. The original chart of the Scientific Advisory Committee can be found [here](#).

The Scientific Advisory Committee consists of representatives from the following organizations:

- Dominikanische Physikalische Gesellschaft (DPPG)
- Deutsche Physikalische Gesellschaft (DPG)
- Angewandte Physik (APh)
- Bulgarian Physical Society (BPS)
- Croatian Physical Society (CPS)
- Central European Journal of Physics (CEJP)
- Chinese Physical Society (CPS)
- European Physical Society (EPS)
- Hungarian Physical Society (HPS)
- Journal of Physics: Conference Series (JPCS)
- Korean Physical Society (KPS)
- Latin American Physical Society (LAPS)
- Physical Review Letters (PRL)
- Russian Physical Society (RPS)
- Slovak Physical Society (SPS)
- Turkish Physical Society (TPS)

Special Issues

- European Conference on Digital Information Physics (ECDIP)
