PROCEEDINGS OF THE 2013 MPP WORKSHOP

Annecy 11th to 13th March 2013

Edited by *M. Jonker*
Cern, Geneva, Switzerland

Keywords: CERN LHC, Workshop-Proceedings, Machine-Protection, LS1

Abstract

This report contains the proceedings of the MPP Workshop on LHC Machine Protection, held in Annecy from 11th to 13th March 2013. This MPP Workshop on LHC Machine Protection focusses on the upgrade work in LHC during the Long Shutdown 1 (LS1) for mid-and longer-term improvements of the LHC MP systems.

MPP Workshop

Annecy 11-13 March 2013

The principle aims of the workshop are to discuss mid-and longer-term improvements of the MP systems:

- Review of the current operational experience with MP systems during the first running period (2010-2012).
- Understanding the planned changes of MP equipment during LS1 and the consequences for operation after LS1.
- Identifying areas where improvements are required.
- Ensuring coherence between the different MP systems.
- Identifying misses.

Organizers:

Bernd DEHNING
Stefano REDAELLI
Rüdiger SCHMIDT
Jan UYTHOVEN
Jorg WENNINGER
Daniel WOLLMANN
Markus ZERLAUTH

Editing/Proceedings:

Michael JONKER

Informatics and Infrastructure support:

Pierre CHARRUE

Workshop Secretaries:

Mariane CATALON
Armelle RUYS

Workshop site:

The write-ups for the 2013 MPP proceedings were based on the JaCoW templates, for which the JaCoW team is gratefully acknowledged.
The authors are thanked for their high quality contributions, written during a very busy period.

Table of contents

Session Summaries

Session 1: MPS operational experience (2008 to 2012) and outlook, <i>Daniel Wollmann</i>	6
Session 2: Injection, Extraction and Beam Dump, <i>Jan Uythoven</i>	10
Session 3: Beam diagnostics, <i>Bernd Dehning</i>	12
Session 4: Collimation and Movable Devices, <i>Stefano Redaelli</i>	14
Session 5: Electrical circuit related protection, <i>Markus Zerlauth</i>	17
Session 6: Operation after LS1, <i>Jorg Wenninger</i>	20

Session 1: MPS operational experience (2008 to 2012) and outlook

Performance and availability of MPS 2008-2012, <i>Benjamin Todd</i>	24
MPS issues and MP approach concerning operation and MDs, <i>Markus Zerlauth</i>	28
Operation's view on handling of MP issues, <i>Giulia Papotti</i>	31
Global vision of MPS after LS1 and beyond, <i>Rudiger Schmidt</i>	35

Session 2: Injection, Extraction and Beam Dump

LBDS kickers, <i>Nicolas Magnin</i>	40
LBDS protections, <i>Brennan Goddard</i>	47
Injection, <i>Wolfgang Bartmann</i>	52
Changes in SPS interlocking, <i>Jorg Wenninger</i>	56

Session 3: Beam diagnostics

Hardware changes in BLM system during LS1, <i>Christos Zamantzas</i>	61
Beam losses and thresholds, <i>Eduardo Nebot Del Busto</i>	68
Experiences with feedback systems and foreseen improvements for LS1, <i>Ralph Steinhagen</i>	72
Experiences with MPS related systems and foreseen improvements for LS1, <i>Enrico Bravin</i>	77

Session 4: Collimation and Movable Devices

Moveable Devices, <i>Stefano Redaelli</i>	82
Settings generation, management and verification, <i>Gianluca Valentino</i>	87
Beam-based validation of settings, <i>Belen Maria Salvachua Ferrando</i>	93
Collimator hierarchy limits: assumptions and impact on machine protection and performance, <i>Roderik Bruce</i>	99
Updated robustness limits for collimator materials, <i>Alessandro Bertarelli</i>	108

Session 5: Electrical circuit related protection

Powering issues, <i>Scott Rowan</i>	113
Changes in QPS, <i>Reiner Denz</i>	118
Changes in powering interlocks, <i>Ivan Romera Ramirez</i>	122
Electrical distribution: How to ensure dependable and redundant powering of systems?, <i>Vincent Chareyre</i>	125

Session 6: Operation after LS1

Post LS1 operation, <i>Gianluigi Arduini</i>	130
Update on beam failure scenarios, <i>Jan Uythoven</i>	135
Post LS1 Operational Envelope & MPS implications, <i>Matteo Solfaroli Camillocci</i>	138
Software tools for MPS, <i>Kajetan Fuchsberger</i>	141
Interlocking strategy versus Availability, <i>Laurette Ponce</i>	147
