MTTR & Spare Parts Policy for the LHC injectors, experimental areas and other facilities: TS Groups & AB-ABP group

10:10-10:50

Rui Nunes: MTTR and spare parts, TS/CSE

The presentation will describe the present policy for standby services and spare parts management for the S(PS) access control & safety systems as well as the different safety systems (Automatic Fire Detection, Flammable Gas detection and Evacuation).

As the systems have in some cases reached a state of obsolescence and are becoming expensive to maintain a very brief description of the upgrade projects and their planning will also be given. The use of the corporate asset tracking and maintenance management system is described by some pertinent examples.
