MTTR & Spare Parts Policy for the LHC injectors, experimental areas and other facilities: TS Groups & AB-ABP group

11:30-12:10

David Widegren: Maintenance management with D7i

This presentation will show how CERN's centrally supported asset tracking and maintenance management system, Datastream7i, can be used to reduce the MTTR and how it can both support and improve your maintenance management work. Several practical examples will be presented and both its main capabilities of today as well as some future functionality will be shown.
