

## **Overview of the main events related to TS equipments for 2007**

S. Deleval, TS-CV-OP

In this presentation we will look back at the 2007 run, and examine all stops related to TS equipments. A major events exhaustive list will be present with their cause and the impact on the accelerators or experimental areas. All actions taken to fix the problem and if possible to prevent other events of that type in the future will be detailed. The most important events will be analyzed in detail. For example the problem of the increase of the gas release will be explained from a ventilation point of view.

Keywords: Ventilation, Power cut, Access, SPS Compensator, AD compressed air, Isolde gas release, CNGS ventilation
