

Session Program

21-23 Jan 2008

- ATC/ABOC Days -

***Session 2 - Operation at high intensity of the
CERN machines***

CERN, 874-1-011

Monday 21 January

14:00

Session 2 - Operation at high intensity of the CERN machines

Session | Location: CERN, 874-1-011

14:00-14:30

Radiation Protection Constraints for the operation of CERN's beam facilities

Speaker

Heinz Vincke

14:30-15:00

THE ARCON-RAMSES bridge

Speaker

Daniel Perrin

15:00-15:30

Radiation Issues of the PS and SPS accelerator

Speaker

Simone Gilardoni

15:30-16:00

Coffee break

16:00-16:30

Are radiation constraints limiting the ISOLDE operation in 2008?

Speaker

Richard Catherall

16:30-17:00

Towards a modified n-TOF facility to increase radiation safety

Speaker

Markus Brugger

17:00-17:30

Ensuring safe and reliable operation of CNGS as of 2008

Speaker

Edda Gschwendtner

17:30
