

## Title

### **X-ray Detectors for Synchrotrons**

## Speaker

### **John Morse**

## CV

John Morse obtained his PhD in Physics and worked for several years at the Institut Laue Langevin, the Rutherford Laboratory and then in industry before joining the ESRF as head of the detector group in 1989. Since that time he has been involved in various projects of synchrotron X-ray detector support and development, and recently while on sabbatical leave, assisted the commissioning of novel pixel detectors at SLAC developed for their free electron laser X-ray source. He is now a detector engineer in the ESRF Instrumentation Division, with a particular interest in the development diamond X-ray beam monitors.
