

Work packages

Design & simulations	Quality QA & QC
Construction (N x sites)	Prototypes, M-1
Alignment systems	N x Module M0
Electronics	Industrialization / PCBs
Cooling system	Common components
Gas system	MM sector assembly
Power system (HV, LV...)	Integration / interfaces
Radiation tests	Integration on the wheel
PCBs tests (before using)	Commissioning
Test beam	Integration in cavern
Cosmic bench	Transport and storage

Milestones

- Qualifications of the components and of the functionalities with the prototypes, not only for mechanics...
- Supplying of common components
- Functional tests with radiations
- Organisational milestones (project reviews) ?
- ...

Organisation, what is the best option for the MM community ?

- Only local task leaders
- Global + local task leaders
- Or mixed options / WPs
- ...

 To define the MM development plan
