## CERN's Maintenance Management Project and Maintenance Framework Implementation Office

*Wednesday 13 November 2013 11:40 (20 minutes)*

CERN accelerator complex and injector chain have entered since a few years an operation dominated phase during which getting maintenance right is one of the key factors for increasing the accelerator availabilities and reducing downtimes. Four CERN departments have identified common needs in the area of maintenance management and have put into place at the end of 2011 a transversal project with the mandate to harmonize maintenance methods.

This presentation will introduce the Maintenance Management Project (MMP) and its Maintenance Framework Implementation Office (MFIO). It shall give an overview of the objectives, the organization, the developed concepts as well as the current implementation status with a spotlight on the latest developments in the area of documentation management and asset and spare part management accompanied by examples of used cases.

**Authors:** DELAMARE, Christophe (CERN); MUGNIER, Christophe (CERN); LAFARGE, Damien (CERN); WIDEGREN, David (CERN); Mr VAN UYTVINCK, Eric (CERN); PERINIC, Goran (CERN); RUEHL, Ingo (CERN); Dr GOURBER-PACE, Marine (CERN); BONNAL, Pierre (CERN); PILON, Regis (CERN); ZAHARIEVA, Zornitsa (CERN)

**Presenter:** MUGNIER, Christophe (CERN)

**Session Classification:** Organizations and their A&MM methods
