# IP DOMAINS

And protect events by domain

# IP DOMAINS

Do it from the event management page

The screenshot shows the INDI@CO event management system. The top navigation bar includes links for Home, Create event, Room booking, Administration, My profile, and Help. The current page is for the event 'FPCP 2013 - Flavor Physics & CP Violation' (19 May - 24 May), created by Bruno SOUZA DE PAULA. The left sidebar lists various event settings like General settings, Timetable, Material, Room booking, Programme, Registration, Abstracts, Contributions, Paper Reviewing, Video Services, Evaluation, Chat Rooms, and Advanced options. The main content area shows the 'Modification control' tab, which is currently set to 'Accessible from everywhere'. A modal window titled 'Domain control' is open, displaying the same 'Accessible from everywhere' status and a list of networks to restrict access to: CERN and LNF. A red arrow points to the 'CERN' checkbox, which is currently unchecked. Below the modal, the 'Domain control' section is visible, showing the event's status as 'PUBLIC' and options to change it to 'RESTRICTED'.

Room Booking Room Mappers

## Room Mappers

### Room Mapper for CERN - Modification

Room Mapper name

Description

Place name to match the location with  
(e.g. CERN)

Regular expressions to match room with  
enter each regular expression in a new line.

Map URL  
(e.g. [http://www.example.com/map?go={\['{building}--{floor}--{roomNr}'\]}](http://www.example.com/map?go={['{building}--{floor}--{roomNr}']}))

Every named group from regular expression will be put to corresponding value name in the Map URL field.

Room booking module is enabled so you have to use specific group names in Map URL field: {building}, {floor} and {roomNr}. If you do not use them Room Mapper will not work for rooms from Room booking module.

ok

Room Booking Room Mappers

### Room Mapper for CERN - Modification

Room Mapper name CERN

Description

#### Regular expressions to match room with

enter each regular expression in a new line.

```
(([^\s]*)-([^\s]*)-([^\s]*)  
^([^\s]*)\s([^\s]*)*$  
^([^\s]*)\s([^\s]*)\s([^\s]*)*$  
([^\s/]*) ([^\s/]*)-([^\s/]*)
```

Every named group from regular expression will be put to corresponding value name in the Map URL field.

#### Map URL

https://maps.cern.ch/map?go=['{building}-{floor}-{roomNr}']

https://maps.cern.ch/mapsearch/mapsearch.htm?lo

Room booking module is enabled so you have to use specific group names in Map URL field: {building}, {floor} and {roomNr}. If you do not use them Room Mapper will not work for rooms from Room booking module.

ok

# ROOMS — ROOM MAPPER

Configure how rooms are mapped for each location

[https://maps.cern.ch/mapsearch/mapsearch.htm?  
loc=\['{building}/{floor}-{roomNr}'\]](https://maps.cern.ch/mapsearch/mapsearch.htm?loc=['{building}/{floor}-{roomNr}'])

This can be handled via:

- › Room Booking plugin
- › Regular expressions

# ROOMS — ROOM MAPPER

## Quick example

A screenshot of the ROOMS ROOM MAPPER web application. The interface has a dark grey header with navigation icons (home, back, forward, etc.), a calendar icon, and buttons for 'iCal export' and 'More'. On the right, it shows the selected location 'Europe/Zurich' and the user 'A. Aviles Del Moral'. The main content area has a blue header with the text 'Academic Training Lecture Regular Programme' and 'Perturbative QCD (3/3)'. Below this, it says 'by Aude Gehrmann-De Ridder (ETH Zurich)' and 'Friday, May 24, 2013 from 11:00 to 12:00 (Europe/Zurich) at CERN ( 500-1-001 - Main Auditorium )'. A red arrow points to the location text with the word 'CLICK' in red. A 'Manage' button is on the right. At the bottom, it says 'Other occasions' followed by two numbered links, '1' and '2'.

CO<sub>2</sub> cooling systems for particle detectors at CERN -  
from 1 kW to 15 kW (Europe/Zurich)

Manage ▾

Description

EndoTOPPET is a CO<sub>2</sub> cooling technology for the Atlas IBL and CMS Pixel Phase I Upgrade detectors. Full scale prototype cooling units have been built in the last year to prove the feasibility of both projects and gain experience with this new technology. The ATLAS IBL 1 kW prototype cooling unit has been commissioned between September 2012 and May 2013 in the PH/DT cooling lab. The commissioning of the 15 kW CMS cooling system will start in the coming weeks in the former CMS Tracker Integration Facility. This seminar presents the design and construction aspects of both units and the results of the commissioning for the 1 kW ATLAS unit . Plans for the commissioning of the CMS unit are shown, with highlights on the lessons learnt during the last months commissioning of ATLAS plant.

Options API Keys

### API Options

HTTPS	<input checked="" type="checkbox"/> <b>Require HTTPS for authenticated API requests</b>
Persistent signatures	<input checked="" type="checkbox"/> <b>Allow users to enable persistent signatures (without timestamp)</b>
Enable persistent signatures agreement	Enabling persistent signatures will allow signed requests without a timestamp. This means that the same link can be used forever to access private information. This introduces the risk that if somebody finds out about the link, he/she can access the same private information as yourself. By enabling this you agree to
Disable persistent signatures agreement	When disabling persistent signatures, all signed requests need a valid timestamp again. If you enable them again, old persistent links will start working again - if you need to to invalidate them, you need to create a new API key!
HTTP API User Agreement	In order to enable an iCal export link, your account needs to have a key created. This key enables other applications to access data from within Indico even when you are neither using nor logged into the Indico system yourself with the link provided. Once created, you can manage your key at any time by going to,
Persistent signatures User agreement	In conjunction with a having a key associated with your account, to have the possibility of exporting private event information necessitates the creation of a persistent key. This new key is also associated with your account and whilst it is active the data which can be obtained through using this key can be obtained by,

# PROTECTION

The screenshot displays the Indico web interface. At the top, the Indico logo is visible, followed by a navigation bar with links: Home, Create event, Room booking, Administration, My profile, and Help. Below this, a breadcrumb trail shows 'Home » Experiments » CMS meetings'. The main content area is titled 'CMS meetings' and lists various committees and events, including 'CMS Career Committee', 'Management meetings with Indico', 'CMS Off-Site Events', 'Joint Offline/Computing/PPD/Physics Performance and Spokesperson Meetings', 'Commissioning and Run Coordination', 'Miscellaneous', 'Task forces', 'Offline & Computing Coordination', 'PH - Physics', 'PubComm (Publications Committee)', and 'Trigger Coordination'. A red 'Restricted' banner is overlaid on the page, with a white box containing the following text:

The information on this web page is restricted for display to named individuals or specific groups.

Circulation to people other than the intended audience is not authorized. You are obliged to treat the information with the appropriate level of confidentiality, as defined in the CERN Data Protection Policy.

[Learn more about Indico and Security](#)

In the background, a smaller 'Restricted' banner is visible, and a list of users is partially shown, including Camporesi, T., Incandela, J., Secretariat, C., and Varela, J.

Thank you for your time!
