# Main goals

---

- ▶ Increasing competitiveness for Romanian companies, ensuring at the same time the principles for sustainable development through technology transfers between research and development and the business area, by taking over the results of the Association's members' research and by cooperating with the public administration, both at a local level and also at the central one;
  - ▶ Developing capacities for research, development and innovation for companies and encouraging their access to research activities;
  - ▶ Promoting the results of the Association's members' research as an entity in the science community in Romania, EU and worldwide.
- 

# Specific goals

---

- ▶ Cooperation between the research-development and innovation institutions and the business environment through common projects;
  - ▶ Facilitating access to the results of the applied research of the Physics Platform of the Măgurele City and of the other members of the Association;
  - ▶ Using the opportunities given by the existent potential for research and development, including applied research, as well as the one created by the ELI-NP project;
  - ▶ Attracting European, international, national, and local funds, in order to add the contribution of the members to mutual interest projects;
  - ▶ Simplifying the technology transfer processes, and consolidating a favorable environment for sustainable development of the business environment;
  - ▶ Developing the Association's activity by creating a scientific, industrial, and technologic park in the city of Măgurele;
  - ▶ Developing activities for training and professional development.
- 
- 

- 
- ▶ *The Association will cooperate with the local authorities in Romania, with other profile institutions of the Romanian state or at the European Union level, as well with «cluster» associations in Romania and from abroad, in order to fulfill its goals.*

Msc. Eng. Cristian Cristescu  
Head of CTTM IFIN-HH

**Măgurele High Tech Cluster (MHTC)**
