

# **2013 CHIPP Annual Plenary Meeting**

Monday 24 June 2013 - Wednesday 26 June 2013

Campus Sursee

## **Book of Abstracts**

# Contents

Plenary Meeting: Introduction . . . . .	1
Welcome . . . . .	1
Welcome . . . . .	1
Administrative and organisational set-up . . . . .	1
Specific information regarding the Campus . . . . .	1
CHIPP Prize award . . . . .	1
CHIPP Prize presentation . . . . .	1
The Strategy process & comments . . . . .	1
Report from the Council meeting and its Strategy discussion . . . . .	2
Statement from the SERI . . . . .	2
Call for provocative statements wrt the strategy paper . . . . .	2
Status/overview of theoretical particle physics in CH . . . . .	2
Some implications for particle physics from the results of the Planck satellite . . . . .	2
Testing the Standard Model and waiting for Godot . . . . .	2
On theory after the Standard Model . . . . .	2
CHIPP Outreach (incl. project report) . . . . .	2
CHIPP Computing Board . . . . .	3
ACCU . . . . .	3
ECFA . . . . .	3
ApPEC . . . . .	3
NuPEC . . . . .	3
SPS . . . . .	3
Elections . . . . .	3

Neutrino oscillation experiments: OPERA, T2K, microboone . . . . .	3
CTA . . . . .	4
DARWIN . . . . .	4
LBNO . . . . .	4
Space based ApP . . . . .	4
ATLAS physics results . . . . .	4
CMS physics results . . . . .	4
LHCb physics results . . . . .	4
Swiss involvement / contribution to LHC machine . . . . .	4
Swiss involvement in LHCb upgrade . . . . .	4
Swiss involvement in CMS upgrade . . . . .	5
Swiss involvement in ATLAS upgrade . . . . .	5
High-energy frontier circular colliders (LHC + hi-lumi, HE-LHC, VLHC, TLEP) . . . . .	5
Linear colliders ILC - CLIC . . . . .	5
Swiss contributions to accelerator R&D . . . . .	5
Detector R&D: cryo noble liquids . . . . .	5
R&D for CLIC detectors . . . . .	5
Precision tests of Higgs physics & the EW theory at a circular e+e- collider . . . . .	5
Higgs Physics at the ILC . . . . .	6
MEG results and upgrade . . . . .	6
Mu3e . . . . .	6
Laser spectroscopy of muonic atoms . . . . .	6
Measuring the gravitational acceleration of antimatter with an antihydrogen beam . . . . .	6

## **Plenary Meeting: Introduction**

**Corresponding Author:** klaus.kirch@psi.ch

**1**

## **Welcome**

**Corresponding Author:** klaus.kirch@psi.ch

**Plenary Meeting: Introduction / 2**

## **Welcome**

**Corresponding Author:** klaus.kirch@psi.ch

**Plenary Meeting: Introduction / 3**

## **Administrative and organisational set-up**

**Plenary Meeting: Introduction / 4**

## **Specific information regarding the Campus**

**CHIPP Prize presentation / 5**

## **CHIPP Prize award**

**CHIPP Prize presentation / 6**

## **CHIPP Prize presentation**

**Setting the Scene: European Strategy for Particle Physics / 7**

## **The Strategy process & comments**

Setting the Scene: European Strategy for Particle Physics / 8

## **Report from the Council meeting and its Strategy discussion**

Setting the Scene: European Strategy for Particle Physics / 9

## **Statement from the SERI**

Setting the Scene: European Strategy for Particle Physics / 10

## **Call for provocative statements wrt the strategy paper**

Viewpoints from CH-Theoretical Physics / 11

## **Status/overview of theoretical particle physics in CH**

Viewpoints from CH-Theoretical Physics / 12

## **Some implications for particle physics from the results of the Planck satellite**

Viewpoints from CH-Theoretical Physics / 13

## **Testing the Standard Model and waiting for Godot**

Viewpoints from CH-Theoretical Physics / 14

## **On theory after the Standard Model**

CHIPP Report from Committees and Elections / 15

## **CHIPP Outreach (incl. project report)**

**CHIPP Report from Committees and Elections / 16**

## **CHIPP Computing Board**

**CHIPP Report from Committees and Elections / 17**

## **ACCU**

**CHIPP Report from Committees and Elections / 18**

## **ECFA**

**CHIPP Report from Committees and Elections / 19**

## **ApPEC**

**CHIPP Report from Committees and Elections / 20**

## **NuPEC**

**CHIPP Report from Committees and Elections / 21**

## **SPS**

**CHIPP Report from Committees and Elections / 22**

## **Elections**

**Neutrino and Astroparticle Physics – Future CH-activities / 23**

## **Neutrino oscillation experiments: OPERA, T2K, microboone**

**Neutrino and Astroparticle Physics – Future CH-activities / 24**

## **CTA**

**Neutrino and Astroparticle Physics – Future CH-activities / 25**

## **DARWIN**

**Neutrino and Astroparticle Physics – Future CH-activities / 26**

## **LBNO**

**Neutrino and Astroparticle Physics – Future CH-activities / 27**

## **Space based ApP**

**Full exploitation of LHC: Status and outlook / 28**

## **ATLAS physics results**

**Full exploitation of LHC: Status and outlook / 29**

## **CMS physics results**

**Full exploitation of LHC: Status and outlook / 30**

## **LHCb physics results**

**Full exploitation of LHC: Status and outlook / 31**

## **Swiss involvement / contribution to LHC machine**

**Full exploitation of LHC: CH involvement in detector upgrades and HL-LHC / 33**

## **Swiss involvement in LHCb upgrade**

Full exploitation of LHC: CH involvement in detector upgrades and HL-LHC / 34

## **Swiss involvement in CMS upgrade**

Full exploitation of LHC: CH involvement in detector upgrades and HL-LHC / 35

## **Swiss involvement in ATLAS upgrade**

Future post-LHC High Energy Frontier Machines / 36

## **High-energy frontier circular colliders (LHC + hi-lumi, HE-LHC, VLHC, TLEP)**

Future post-LHC High Energy Frontier Machines / 37

## **Linear colliders ILC - CLIC**

Full exploitation of LHC: CH involvement in detector upgrades and HL-LHC / 38

## **Swiss contributions to accelerator R&D**

Detector R&D and Future Higgs Physics Opportunities / 39

## **Detector R&D: cryo noble liquids**

Detector R&D and Future Higgs Physics Opportunities / 40

## **R&D for CLIC detectors**

Detector R&D and Future Higgs Physics Opportunities / 41

## **Precision tests of Higgs physics & the EW theory at a circular e+e-collider**

Detector R&D and Future Higgs Physics Opportunities / 42

## **Higgs Physics at the ILC**

Low Energy Precision Measurements – Future CH-activities / 43

## **MEG results and upgrade**

Low Energy Precision Measurements – Future CH-activities / 44

## **Mu3e**

Low Energy Precision Measurements – Future CH-activities / 45

## **Laser spectroscopy of muonic atoms**

Low Energy Precision Measurements – Future CH-activities / 46

## **Measuring the gravitational acceleration of antimatter with an antihydrogen beam**
