#### Discussion on M5/M6 milestones

##### Speakers

Marco Silari, marco caresana

14:15–15:45

#### Rehearsal of ESR talks at the IEEE Dosimetry Workshop

##### Subcontributions

##### Neutron Beam Profile Measurements with a Triple GEM for Thermal Neutrons at the CERN n\_TOF Facility

###### Speaker

Silvia Puddu

##### $^{55}\text{Fe}$ Measurements in Radioactive Waste with a Triple GEM Detector

###### Speaker

Silvia Puddu

##### "MX-10: Pixel Particle Detector"

###### Speaker

Dr Vijayaragavan Viswanathan

##### "A Novel Neutron Gamma Discrimination Technique for the New LUPIN Pulsed Neutron Detector"

###### Speaker

Chris Cassel

##### Simulation of Neutron Dosimetry with CR-39 Track Detectors and Comparison Against Experimental Calibration Campaigns

###### Speaker

Avin Sashala Naik

##### Characterization of a new Photon Counting Detector with XRF

###### Speaker

Francesca Bisello

##### Mixed Field Data Analysis with Timepix at the CERF Facility

###### Speaker

Stuart Patrick George

**BrachyView: Tomographic Reconstruction Using TimePix Detectors in Post-Implant Dosimetry Checks for Permanent Prostrate Brachytherapy Implants**

**Speaker**  
Kevin Loo
