SL6 Status at Oxford

Status

- SL6 EMI-3 CREAMCE
- SL6 EMI3 WN and gLExec
- Small test cluster with three WN's
- Configured using Puppet and Cobbler
- Using SL5 ARGUS for Authorization/Authentication
- Using wlcg repo for HEP_OSlibs_SL6
- CVMFS setup for LHC VO's
- Separate software area for SL6 but nobody seems to using it

Issues

▸ EMI3 Apel parser not compatible with EMI2 publisher. Downgraded Apel Parser to EMI2

▸ LHCb started running out of box, no special changes required.

▸ CMS having some issues, a ticket is in progress. Looks like issue with cvmfs setting.

▸ ATLAS Nagios test is OK. Some tweaking required at job submission level for production and analysis jobs. Alessandra is looking into it.

▸
