

# Backup / Restore for site owners

Eduardo Alvarez

April 2013

## Backup & Migrate module

- Additional module for files (in development)
  - Only files (public/private) directories by design
  - Complete directory unsupported
- Depends completely on Drupal

## phpMyAdmin + WebDAV

- Manual operations

## Custom solution

- Drupal independent

Allow site administrators to manage their own backups

Two operations

- Backup
- Restore

Different scopes

- Database
- Files
- Both

Different destinations

- Download
- Site folder

## Feedback?
