

ICEC/ICMC 2014 Conference

Thursday, 10 July 2014

Thu-Af-Orals Session 16: Accelerators and Detectors - WA1 (16:15 - 18:30)

-Conveners: Hirotaka NAKAI

time	[id] title	presenter
16:15	[82] [Invited Oral] Beyond the Large Hadron Collider: a first look at cryogenics for CERN Future Circular Colliders	Mr TAVIAN, Laurent Jean LEBRUN, Philippe
16:45	[46] Design of a cosine-theta dipole magnet wound with coated conductors considering their deformation at coil ends during winding process	Prof. AMEMIYA, Naoyuki
17:00	[268] Conductor and Coil Design of the 2 tesla Solenoid for the PANDA Detector at FAIR	Dr ROLANDO, G.
17:15	[50] Thermodynamic Properties of the Superconducting Dipole Magnet of the SIS100 Synchrotron	BLEILE, Alexander
17:30	[270] The Cornell Main Linac Cryomodule: a Full Scale, High Q Accelerator Module for cw Applications	Prof. EICHHORN, Ralf
17:45	[81] The ESS Cryomodule Test Stand	Mr HEES, Wolfgang
18:00	[118] The ICARUS T600 Module liquid argon purification system	VIGNOLI, Chiara
18:15	[136] Final commissioning of the superconducting heavy ion linear accelerator at IUAC. Delhi	Mr DATTA, Tripti Sekhar
