

Update on pp

F Videbaek

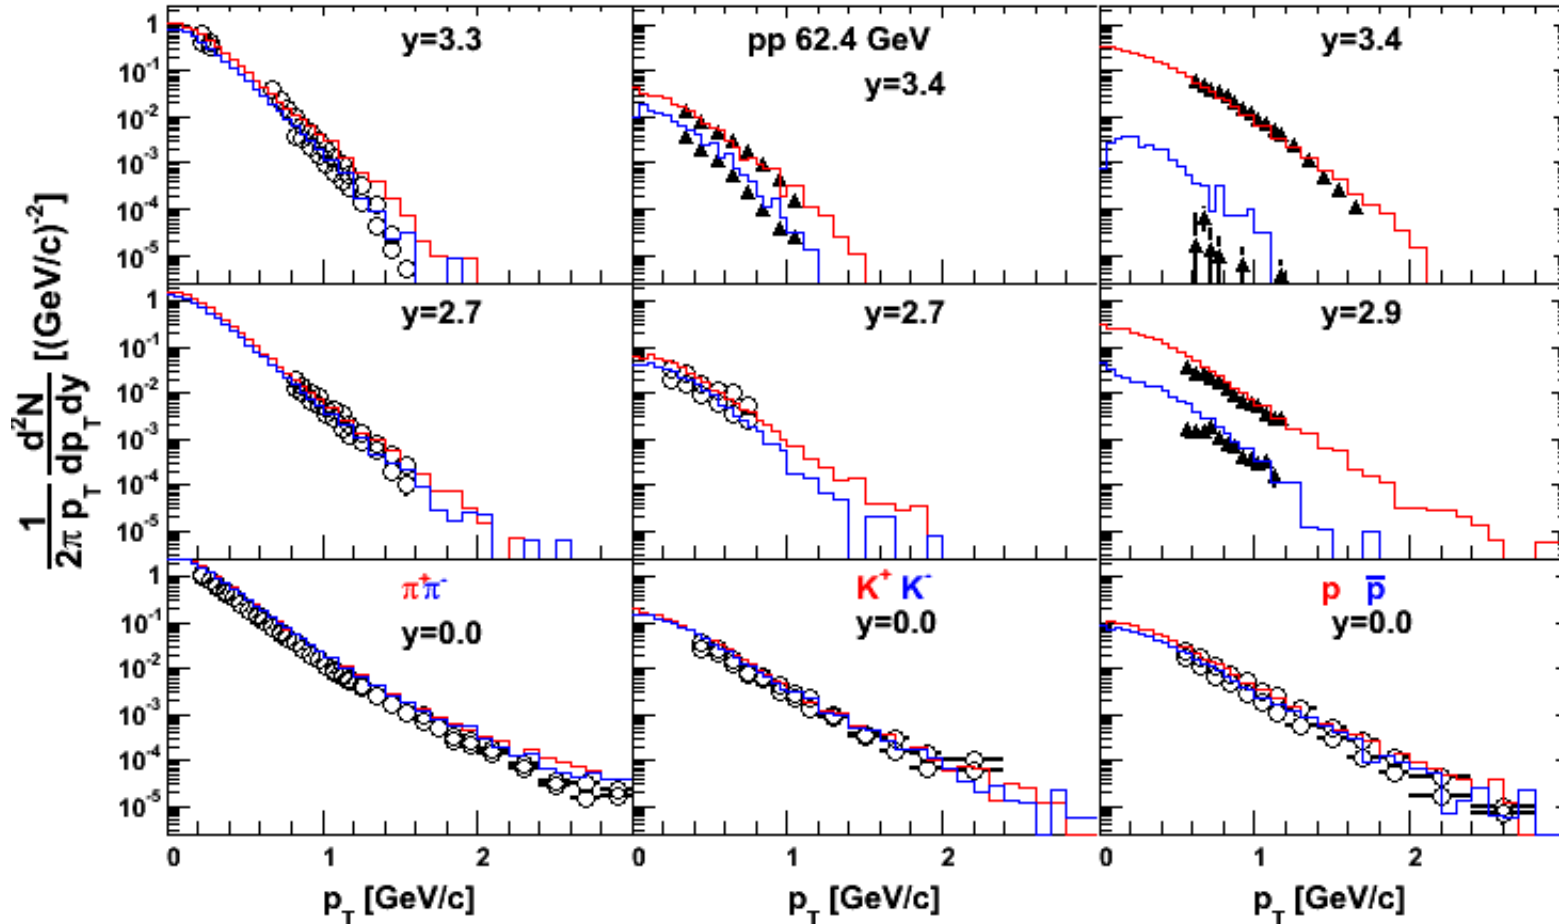

Pi+ spectra comparison 200 GeV. For 2.95 and 3.3 the red triangles is our published pp data (Ramiro analysis). The open the recent analysis. The data are compared to and divided by the Pythia8 default simulation.

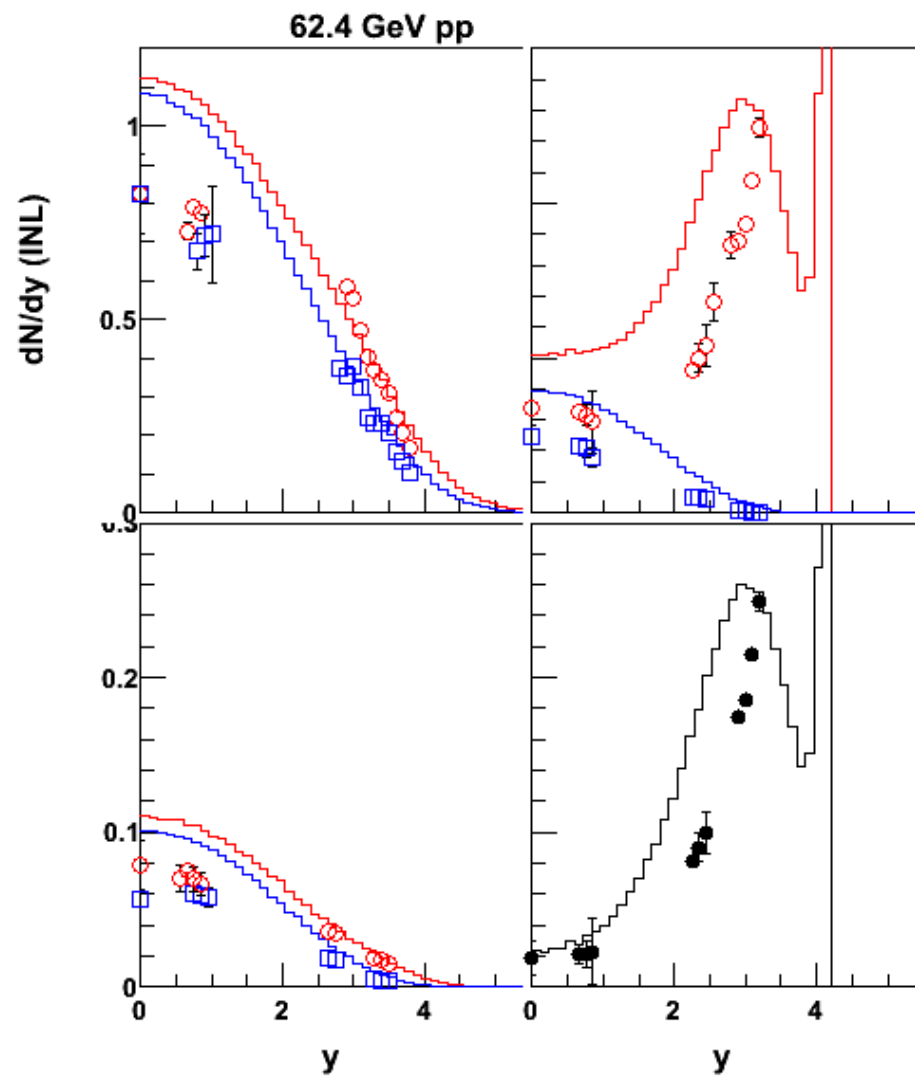

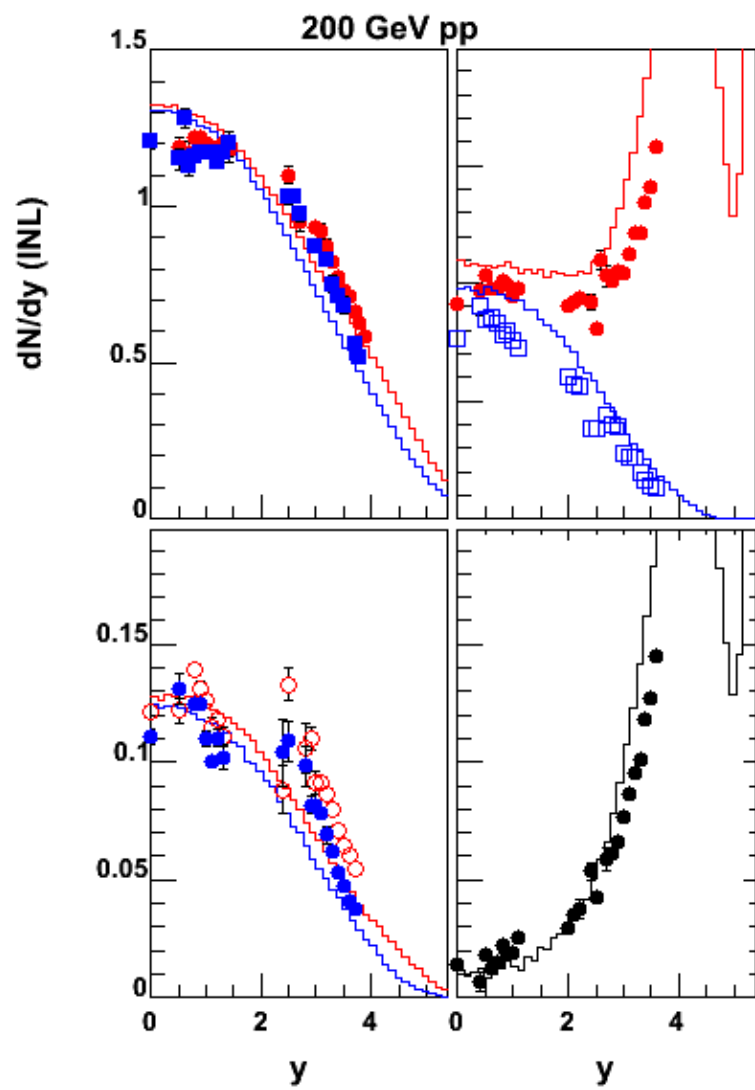

200 GeV pythia8

62.4 GeV Pythia8 figure

To do

- I have a short list of changes that should be made to figures, tables.
- Need data tabulated; need
- Started writing the Pythia section
- Talked with Ramiro in restarting reviewing and editing the text
- I would hope, but cannot guarantee to have a version for Ramiro within a week.
- This is a nice data set and we should have it published
