

Stuff: What is it? - Introduction to Particle Physics and Accelerators

Friday 13 September 2013 09:30 (1 hour)

Since the beginnings of civilisation, mankind has sought to decipher the basic building blocks of matter and the forces that bind them together. This lecture will explain how the modern view of elementary particle physics has been reached and how it is currently being revolutionised by the work going on at the CERN Large Hadron Collider.
