

Diffraction and exclusive dilepton and diphoton production at CDF II

Tuesday, 8 April 2008 14:20 (20 minutes)

We report on the search for exclusive interactions at CDF-II .
These interactions include two photon production of e^+e^- and $\mu^+\mu^-$ final states, doubly diffractive production of a photon-photon final state, and, production of the J/Ψ and the Ψ -prime via gamma-pomeron fusion.
