Mobility at CERN

Tuesday 29 October 2013 16:00 (30 minutes)

With the dramatic increase of wireless-capable devices, Wi-Fi connectivity has become an essential network service on a par with the traditional cabled network. The evolution of the CERN Wi-Fi infrastructure will be presented, including the BYOD strategy and the integration of eduroam. The deployment considerations for large conference rooms and underground facilities will also be addressed.
