

HEPiX Fall 2013 Workshop

Contribution ID: 23

Type: **Oral presentation**

IN2P3-CC IAAS cloud status

Friday, 1 November 2013 09:25 (25 minutes)

The talk presents some past and ongoing testings made around IAAS cloud technologies at IN2P3-CC. Openstack has been deployed for some years now, involved in a variety of projects. The presentation tackles:

- Openstack: the CMP of choice
- use cases with test and production services, computing, community cloud
- implemented features, hardware and services
- impacts on the datacenter
- how to implement high availability with Openstack
- Openstack experience (pros/cons)
- what's next ?
