

HEPiX Fall 2013 Workshop

Contribution ID: 45

Type: **Oral presentation**

HEPiX Bit Preservation Working Group

Thursday, October 31, 2013 9:45 AM (30 minutes)

The goal of the HEPiX Bit Preservation Working Group is to share ideas, practices and experience on bit stream preservation activities across sites providing long-term and large-scale archive services. Different aspects should be covered like: technology used for long-term archiving, definition of reliability, mitigation of data loss risks, monitoring/verification of the archive contents, procedures for recovering unavailable and/or lost data, procedures for archive migration to new-generation technology.

The Working Group is producing a survey on existing practices across HEPiX and WLCG sites responsible for large-scale long-term archiving, and will present its initial findings at the HEPiX Fall'2013 workshop.
