OpenShift on your own cloud

Friday, 1 November 2013 11:45 (25 minutes)

OpenShift has three offerings, Origin, Online, and Enterprise. Now you can enjoy the benefits of Paas in the public cloud, or on your own cloud.

I will be showing OpenShift Origin, setup locally. What features does it have for both admin and user. How will that help both labs and experiments.

Summary

Get all the benefits of OpenShift on your own infrastructure.
