Evolution of the OSG Authentication Model

Wednesday, 30 October 2013 11:30 (30 minutes)

The Open Science Grid (OSG) has undergone some changes in its authentication model for user job submission. This talk will outline changes already implemented as well as future plans as they stand now, together with the use cases that motivated them.

Summary

This will cover changes in the OSG in regards to:

- * OSG's CA transition for X.509 authentication.
- * CILogon basic credentials.
- * Job submission without x.509 credentials.
