Zenodo

Data Visualization

# Outline

- **Prototyping**
  - **ReclineJS**
  - **Adding Features**

- **Implementation**
  - **Cooperating with Invenio**
  - **Integrating with Invenio**

Prototyping

- ReclineJS

Prototyping

- **Adding Features**
  - **Drag to zoom!**
  - **Error bars?**
  - **Revamped appearance**
  - **Visualize root files? (let's be real: probably not happening…)**

Implementation

- **Cooperating with Invenio**
  - **Modifying ReclineJS source code to work in all browsers with Invenio (not just random ones like Opera)**
  - **Combining files and putting them in a proper place in the file hierarchy**

Implementation

- **Integrating with Invenio**
  - **Pop-up or new page (TBD)**
  - **Put together a flavor of ReclineJS solely for use with Invenio**
  - **Branching and Bootstrapping (learning the typical coding process for the project)**
  - **Making the code dynamic**
  - **Location, location, location!**

Adventures
