

## **Session Program**

**5-8 Nov 2013**

# **WPCF 2013 - IX Workshop on Particle Correlations and Femtoscopy**

## ***Session 3: Entrance channel effects on final- state anisotropy***

Acireale (Catania), Italy  
San Biagio Resort, Via Guido Gozzano, 2 - 95024 Acireale (CT), Italy

# Friday 8 November

08:50

## Session 3: Entrance channel effects on final-state anisotropy

**Session** | **Location:** Acireale (Catania), Italy, San Biagio Resort, Via Guido Gozzano, 2 - 95024 Acireale (CT), Italy

08:50–09:15

### Azimuthal angle dependence of HBT radii with respect to the event plane in Au+Au collisions at PHENIX

#### Speaker

T. Niida

09:15–09:40

### HBT interferometry relative to the triangular flow plane in heavy-ion collisions

#### Speaker

C. Plumberg

09:40–10:05

### Azimuthally sensitive pion femtoscopy in Pb-Pb collisions at 2.76 TeV with ALICE

#### Speaker

V. Loggins

10:05–10:25

### The influence of initial conditions on the final observables for heavy-ion collisions at RHIC energies

#### Speaker

R. Marty

10:25–10:45

### Heavy flavour elliptic flow and azimuthal angular correlations with ALICE

#### Speaker

S. Bjelogrić

10:45–10:55

### Multipole solutions of relativistic hydrodynamics

#### Speakers

M. Csanad, T. Csörgő

10:55
