A. Rozanov CERN ACCU 10.09.2008
• Extension of building 40 for more office space will start this autumn. Delivery expected 2010
• Tramway to CERN: design work continue, start of the work expected in 2010, delivery probably in 2011
• Navette to point-5 for start and end of the shifts deployed. Continuation depends on the experience during real usage.
• Restaurant-1 extension by 250-300 places is in negotiation with positive signals.
• Extension of the hostel (probably on the place of building 222) should be studied in the context of the long term development of this area (restaurant-1, building-40, hostels, crossing of the road, terrasses, garden, parkings)
