

State of cdb2sql-ora

- CDB populated by cdb2sql-ora
- Last commit in 2007
- Not on sourceforge
- Does anyone use it outside MS?

Place in MS Aquilon ecosystem

- We have datawarehouse in sqlite
- Denormalized schema, loosely based on AQDB
- Disted via AFS.
- Recreated every 2 hours from CDB.

Work done

- Has all changes over the years in a git repository
- Has some bugs fixed
 - SAX parser
 - Missing CommitCond from Insert
- Looking into performance issues: too many values in CDB now.
