[Invited] Analysis of temperature and current margin of four ITER Central Solenoid conductor designs during a 15 MA plasma scenario with comparison to DC qualification tests

Tuesday 18 June 2013 13:30 (30 minutes)

Author: NIJHUIS, ET AL., A. (University of Twente)

Presenter: NIJHUIS, ET AL., A. (University of Twente)

Session Classification: Superconductor Stability and AC Loss
