## ICMC-2013, the International Cryogenics Materials Conference

Contribution ID: 44 Type: **not specified** 

## Effect of stress ratio on high-cycle fatigue properties of Ti-6Al-4V ELI alloy forging at low temperature

Tuesday 18 June 2013 14:30 (15 minutes)

**Author:** ONO, ET AL., Y. (National Institute for Materials Science)

Presenter: ONO, ET AL., Y. (National Institute for Materials Science)

Session Classification: Mechanical Properties of Structural Materials
