

Latest news and tracking results

M. Giovannozzi

- Latest activities
- General news

Partners: BINP, CEA, CERN, CSIC-IFIC, EPFL, INFN-Frascati, SLAC, Uni-Liv, Uni-Man

Latest activities - I

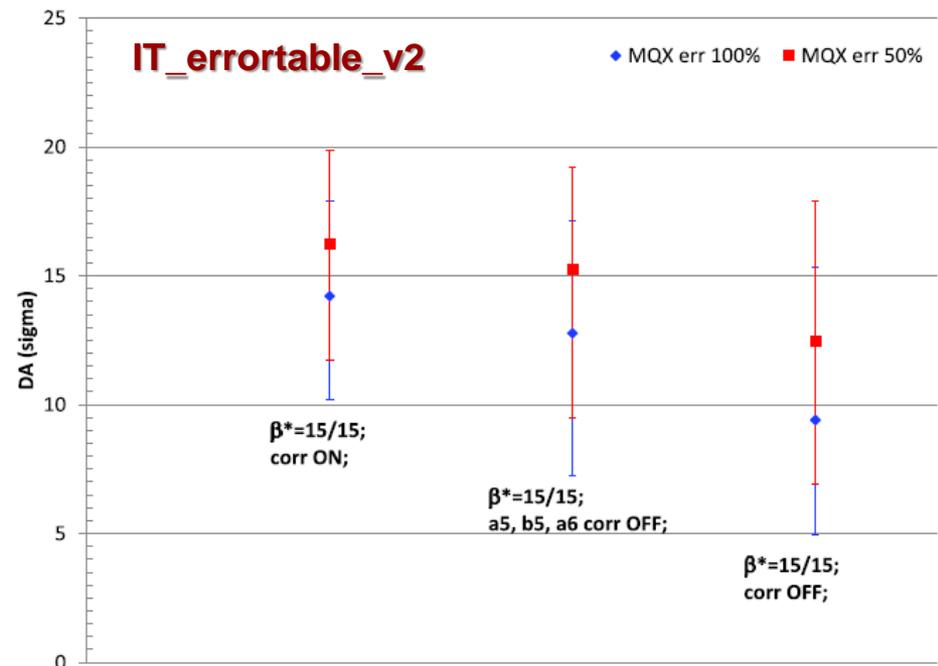

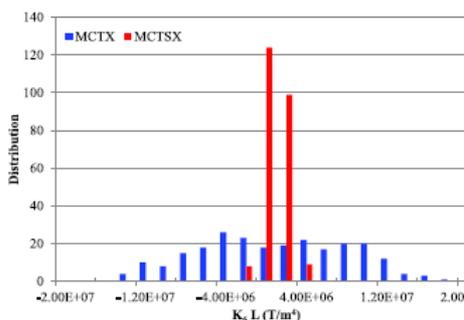

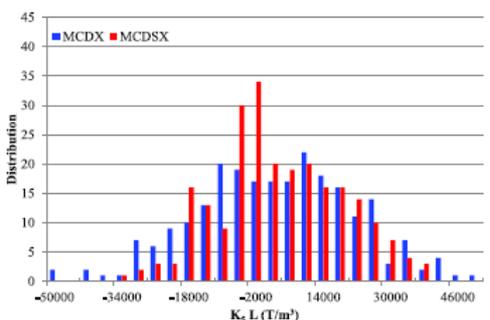

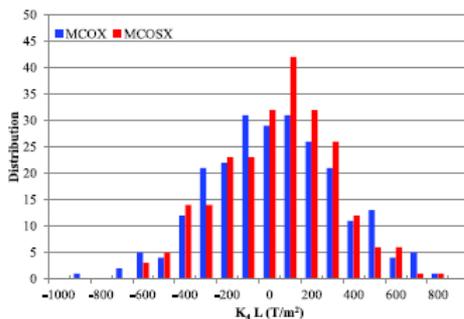

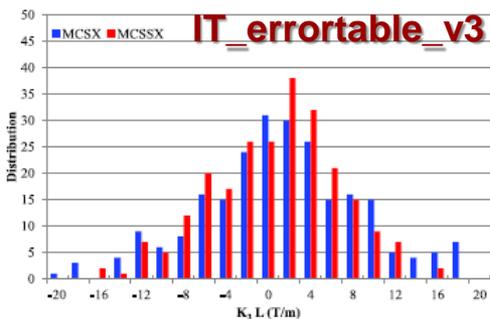

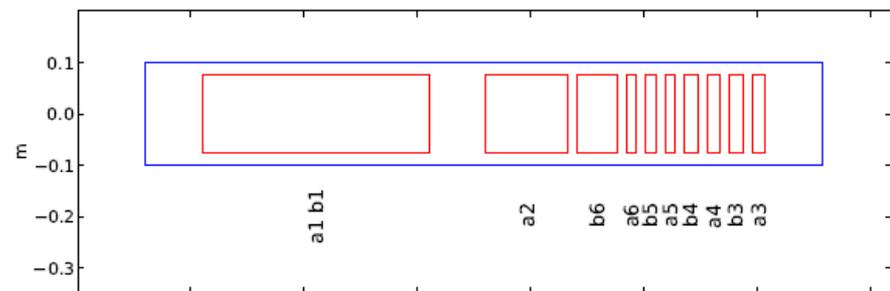

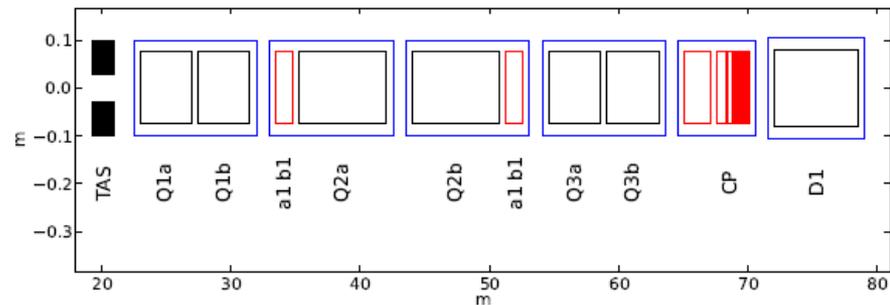

- Specification of triplet correctors (linear and non-linear)
- Evaluation of DA for SLHCV3.1b (IT with 140 mm and 150 T/m)
 - Several optics configurations to probe DA vs. beta*
 - Error in the magnets:
 - Arcs and IRs other than IR15: machine as built
 - IT magnets:
 - IT_errortable_v2
 - FQ specified by SLAC collaborators (61 or 65)

Latest activities - II

- Triplets correctors

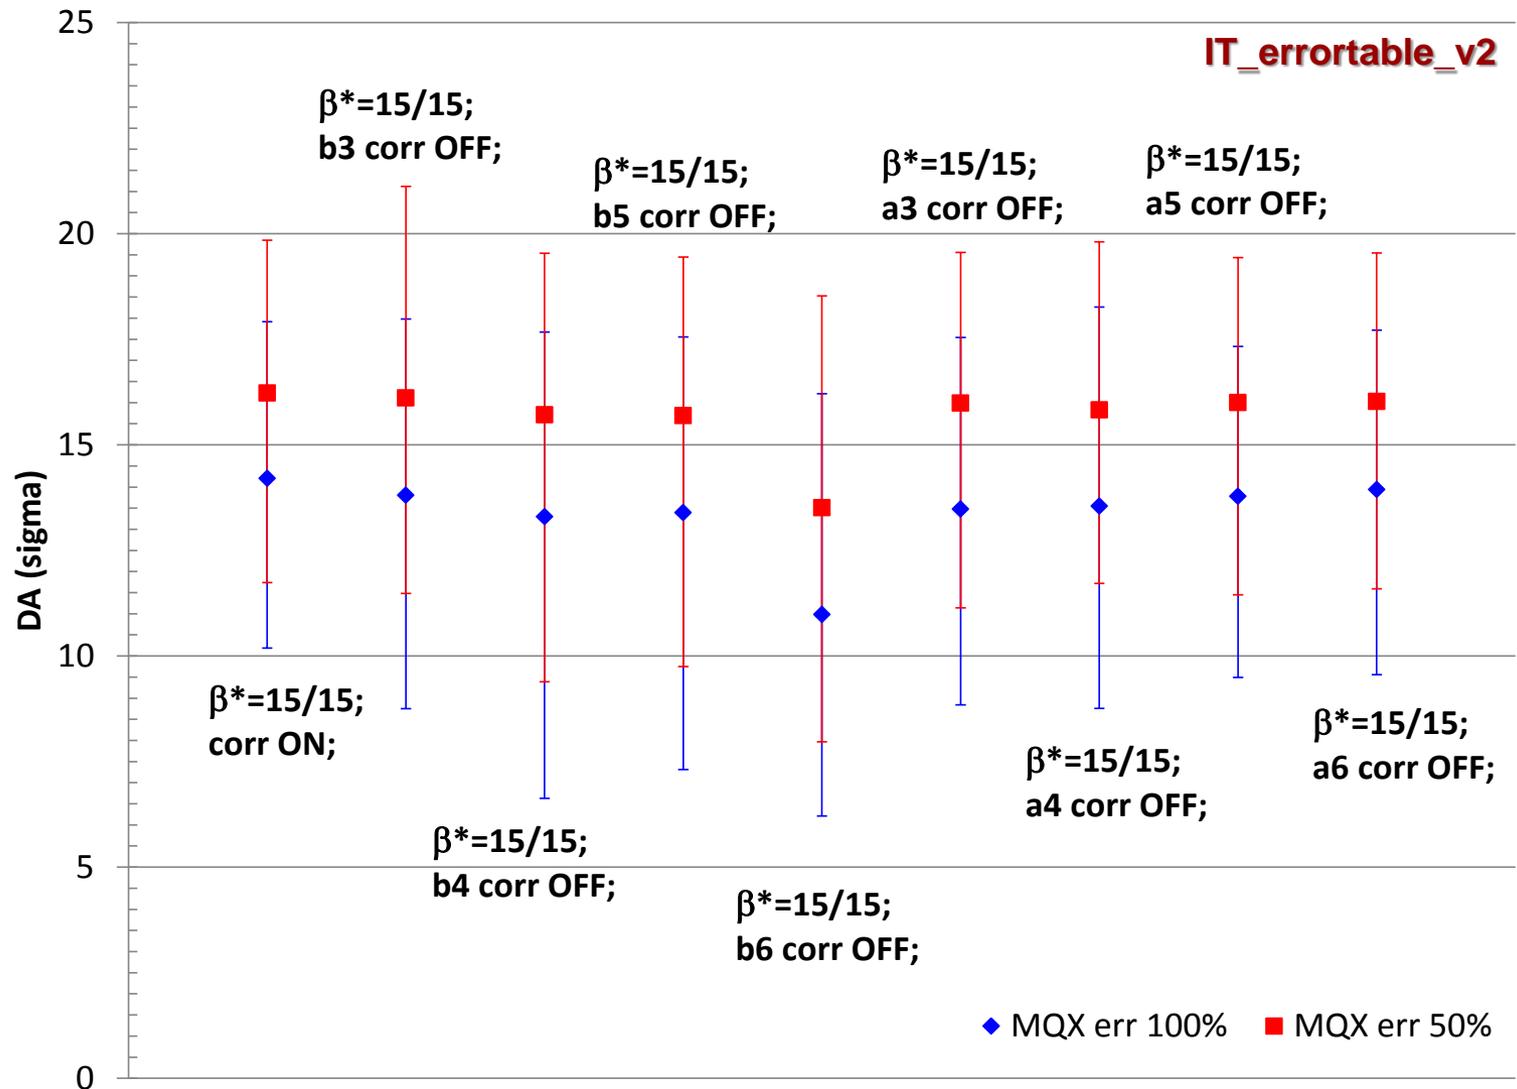

Table 3: Strength of the triplet correctors.

	Computed	Specification
	mT m at 50 mm	mT m at 50 mm
normal	3	31.2
	4	22.9
	5	16.9
	6	57.3
skew	2	500.0
	3	26.3
	4	18.8
	5	11.7
6	11.2	

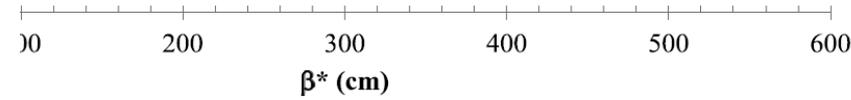

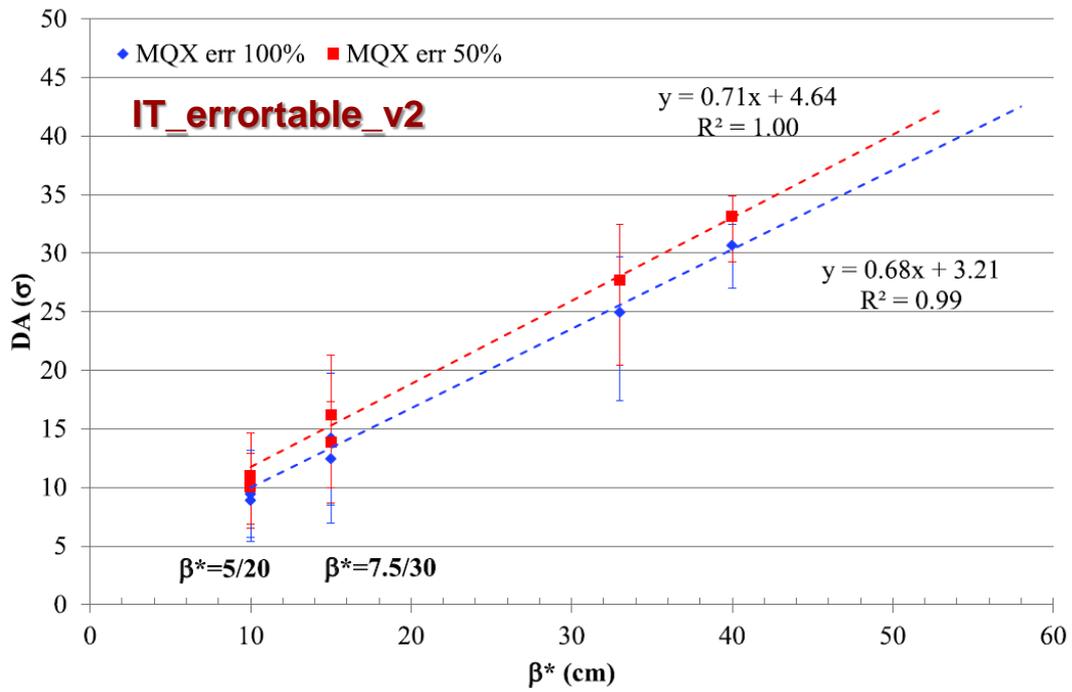

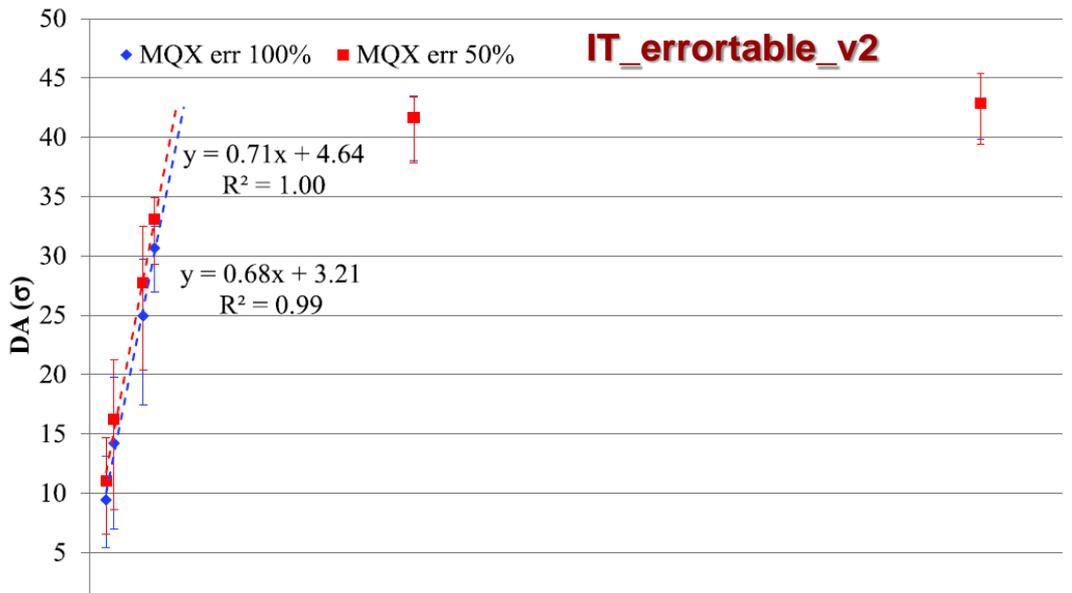

Latest activities - III

- Triplets correctors

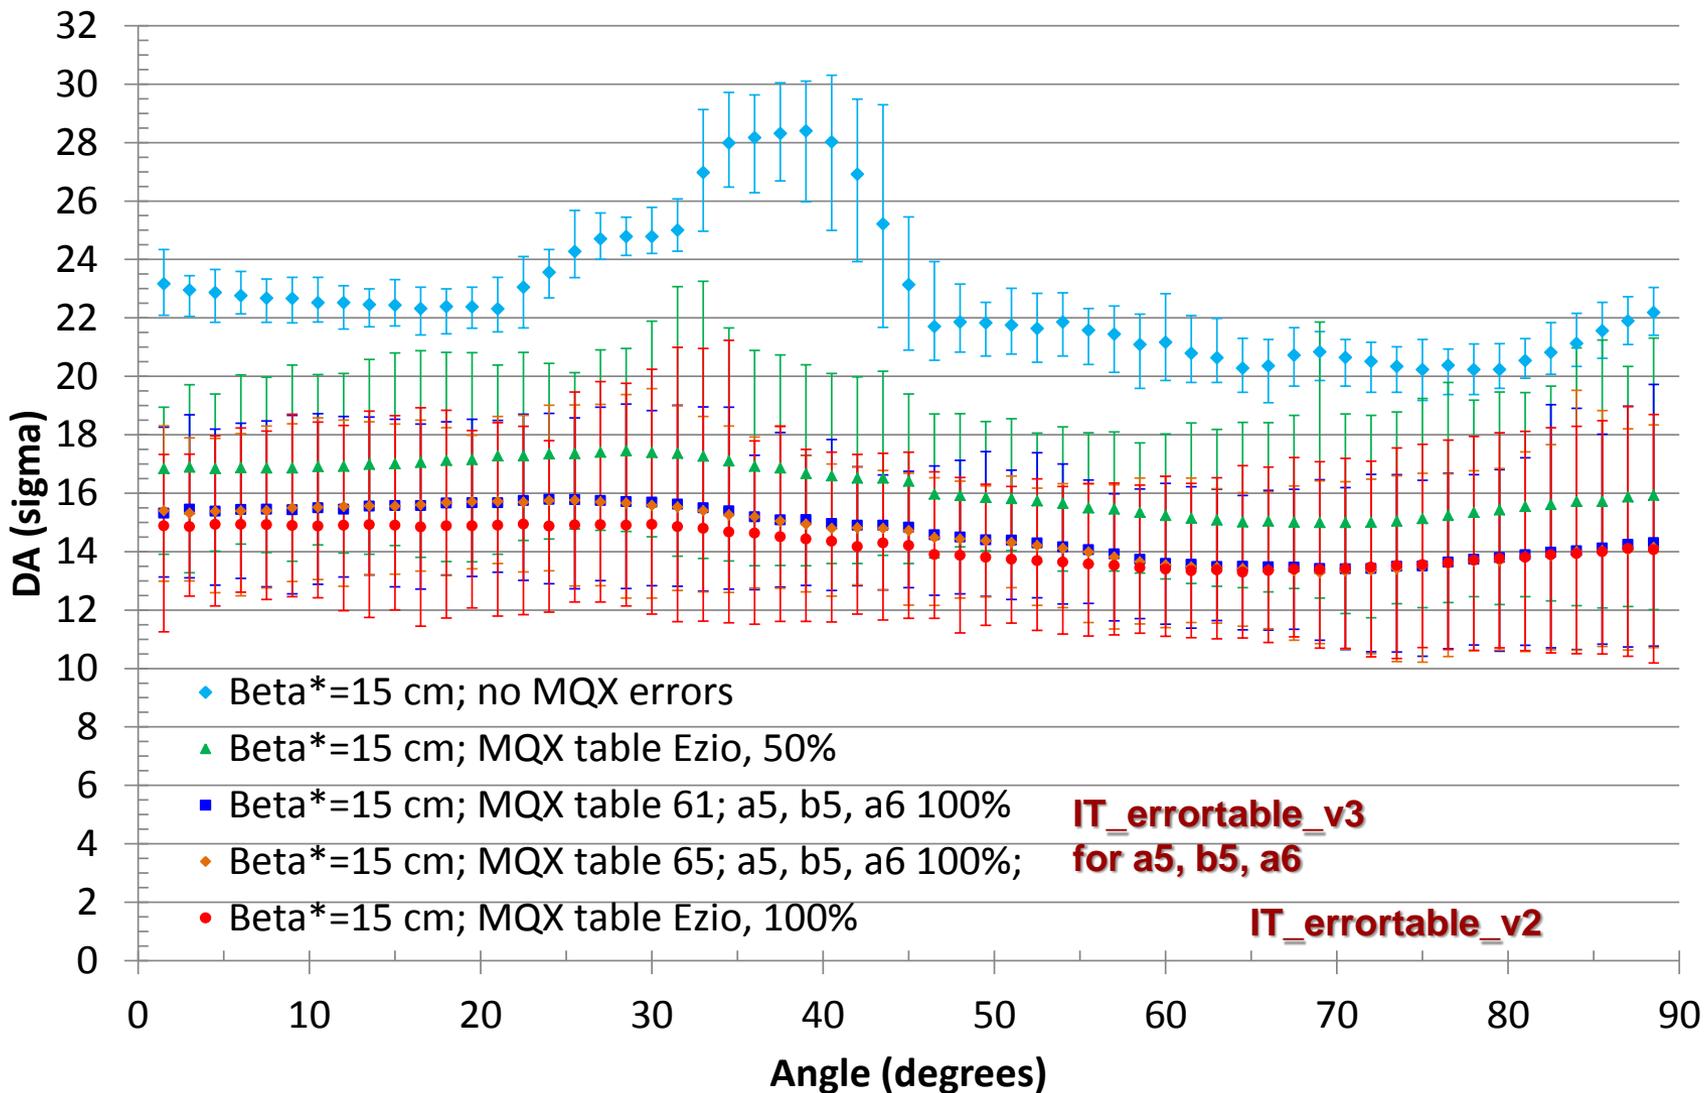

Latest activities - IV

- Impact of beta* on dynamic aperture:
 - Linear below beta*=1 m
 - Constant otherwise
 - Same slope for two sets of IT FQ tables.
 - Offset of 1.5 sigma between the two sets of IT FQ tables.

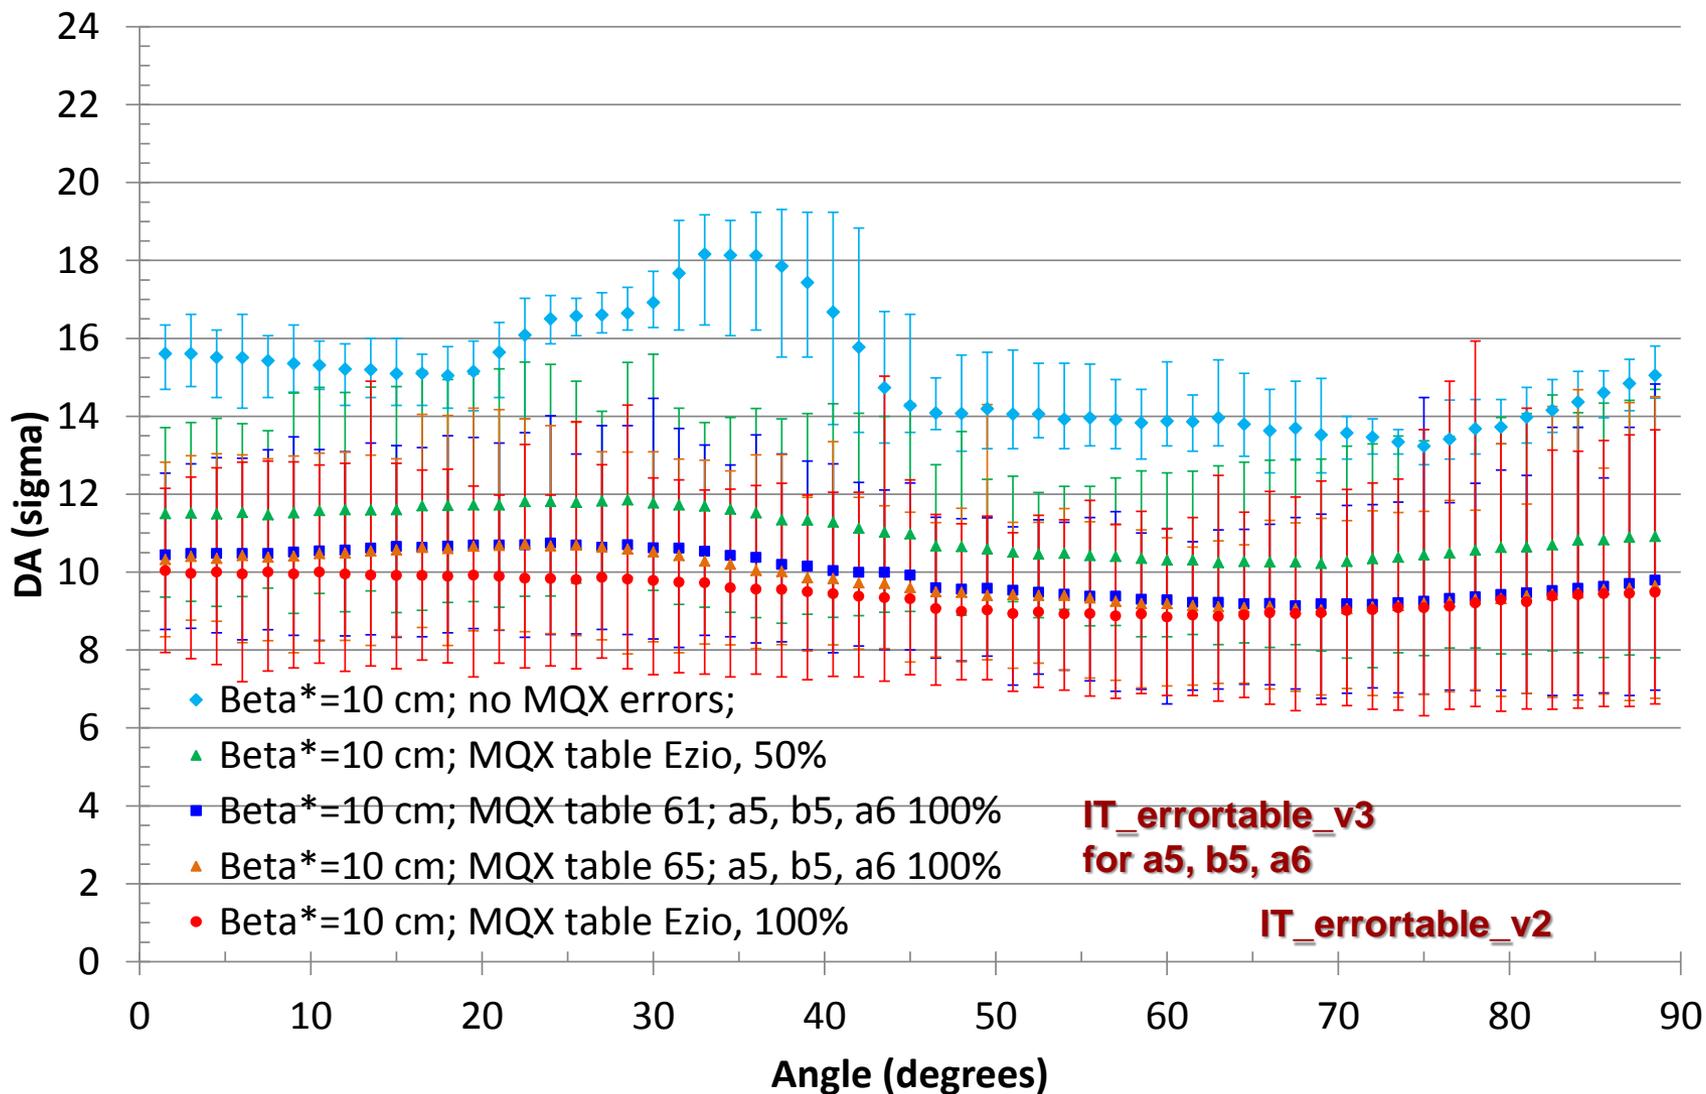

MG

Latest activities - V

Latest activities - VI

General news - I

- Decision to change leadership of Task 2.2 after completion of main goals
 - MG will succeed to Bernhard Holzer: **thanks a lot for the results achieved!**
- New Task in WP2:
 - 2.7 on “Intensity limitations from existing LHC hardware”.
 - Task leader: R. Jones (CERN).
- News from WP3:
 - Estimates of field quality for new D2 magnet should be available in few days.
 - Estimates of field quality for new Q4 should also be available within days.
 - Field quality for Q5 is already available.
 - **Comments awaited from WP3 about the proposed error table for IT.**
- **HLLHCV1.0 optics layout released and documented as IPAC13 paper!**
 - **Next step: add tools to make this version “trackable”.**

General news - II

- Some additional tools required for next steps:
 - Transverse displacement of separation dipoles to take into account correct feed down effects from field quality.
- Important remark:
 - CERN **lxplus** cluster moved to SLC6!
 - **lxplus** is currently an alias to SLC6 machines!
 - Not everything works under SLC6: the tracking environment should be re-installed.
 - Alternative: use **lxplus5** and you will be directed towards SLC5 machines.
- Specification studies for crab cavity field quality to be started in September.
