

Preservation e-Infrastructure IG

Ruth Duerr, David Giaretta, Jamie Shiers

RDA Plenary 3, Dublin, March 2014

Summary Since RDA P1

- Data Preservation / Curation projects have continued to be very active during the past year
 - In some cases, moving to concrete services with sustainable funding models
- Collaboration between these projects is desirable for many reasons
 - Communities overlap, avoid re-inventing wheels etc
- Coordination with other RDA WG and IGs equally important: DP relies on many things
 - Meta-data, PIDs, trusted digital repositories, etc

Outlook for P3 and Beyond

- At least one WG will be proposed
 - More would be possible: do we have resources & bandwidth to handle them? (Please join us!)
- Collaboration between DP projects is real!
 - On-going DP workshop March 25; similar but broader one planned for P4
- Concrete business models + metrics emerging: collaboration between Funding Agencies, Service Providers and User Communities
- Join us at the IG sessions (Wed, Thu) to learn more!
