

Workshop on Experimental Conditions and Beam Induced Detector Backgrounds

Thursday, 3 April 2008 - Friday, 4 April 2008

CERN

Book of Abstracts

Contents

Welcome	1
Tevatron: Sources & cures of background - machine and experiments perspective	1
Discussion	1
Tevatron: background at the Tevatron - experiments perspective	1
Discussion	1
HERA: Sources & cures of background - machine perspective	1
Discussion	1
Background in RHIC	2
Discussion	2
Expected sources of background in LHC operation	2
HERA: background at the HERA - experiments perspective	2
HERA background at the HERA - experiments perspective	2
Discussion	2
Discussion	3

Discussion	3
CMS	3
Discussion	3
ALICE	3
Discussion	3
LHCb	3
Discussion	4
Forward Detectors	4

Discussion	4
Simulation of machine backgrounds	4
Discussion	4
Effects of backgrounds on experiments	4
Discussion	4
Experiments protection	5
Discussion	5
Estimates of residual gas pressure in the LHC	5
Discussion	5
Collimation	5
Discussion	5
Machine-related backgrounds: their origin and loads on ATLAS/CMS	5
Discussion	5
Discussion	6

Experience and recommendations from Tevatron, HERA and RHIC / 0

Welcome

Experience and recommendations from Tevatron, HERA and RHIC / 1

Tevatron: Sources & cures of background - machine and experiments perspective

Authors: Dean Still¹; Jerry Annala¹; Rick Tesarek²

¹ *Fermilab*

² *FNAL*

Corresponding Author: still@fnal.gov

Experience and recommendations from Tevatron, HERA and RHIC / 2

Discussion

3

Tevatron: background at the Tevatron - experiments perspective

Author: Rick Tesarek¹

¹ *Fermilab*

Corresponding Author: tesarek@fnal.gov

4

Discussion

Experience and recommendations from Tevatron, HERA and RHIC / 5

HERA: Sources & cures of background - machine perspective

Corresponding Author: bernhard.holzer@cern.ch

Experience and recommendations from Tevatron, HERA and RHIC / 6

Discussion

Experience and recommendations from Tevatron, HERA and RHIC / 7

Background in RHIC

Authors: Angelika Drees¹; Wolfram Fischer²

¹ *Fachbereich C / Physik*

² *BNL*

Experience and recommendations from Tevatron, HERA and RHIC / 8

Discussion

Experience and recommendations from Tevatron, HERA and RHIC / 9

Expected sources of background in LHC operation

10

HERA: background at the HERA - experiments perspective

Author: Carsten Niebuhr¹

¹ *DESY*

Corresponding Author: niebuhr@mail.desy.de

Experience and recommendations from Tevatron, HERA and RHIC / 11

HERA background at the HERA - experiments perspective

Author: Carsten Niebuhr¹

¹ *DESY*

Corresponding Author: niebuhr@mail.desy.de

Experience and recommendations from Tevatron, HERA and RHIC / 12

Discussion

Experience and recommendations from Tevatron, HERA and RHIC / 13

Discussion

What do the experiments require and provide for optimization / 14

ATLAS

Corresponding Author: witold.kozanecki@cern.ch

What do the experiments require and provide for optimization / 15

Discussion

What do the experiments require and provide for optimization / 16

CMS

Corresponding Author: jeffrey.spalding@cern.ch

What do the experiments require and provide for optimization / 17

Discussion

What do the experiments require and provide for optimization / 18

ALICE

Author: Antonello Di Mauro¹

¹ *CERN*

Corresponding Authors: tapan.nayak@cern.ch, antonio.di.mauro@cern.ch

What do the experiments require and provide for optimization / 19

Discussion

What do the experiments require and provide for optimization / 20

LHCb

Corresponding Author: gloria.corti@cern.ch

What do the experiments require and provide for optimization / 21

Discussion

What do the experiments require and provide for optimization / 22

Forward Detectors

Corresponding Author: mario.deile@cern.ch

What do the experiments require and provide for optimization / 23

Discussion

LHC conditions : what can be expected and optimized / 24

Simulation of machine backgrounds

Corresponding Author: vadim.talanov@cern.ch

LHC conditions : what can be expected and optimized / 25

Discussion

LHC conditions : what can be expected and optimized / 26

Effects of backgrounds on experiments

Corresponding Author: mika.huhtinen@cern.ch

LHC conditions : what can be expected and optimized / 27

Discussion

LHC conditions : what can be expected and optimized / 28

Experiments protection

Corresponding Author: daniela.macina@cern.ch

LHC conditions : what can be expected and optimized / 29

Discussion

LHC conditions : what can be expected and optimized / 30

Estimates of residual gas pressure in the LHC

Corresponding Author: adriana.rossi@cern.ch

LHC conditions : what can be expected and optimized / 31

Discussion

LHC conditions : what can be expected and optimized / 32

Collimation

33

Discussion

LHC conditions : what can be expected and optimized / 34

Machine-related backgrounds: their origin and loads on ATLAS/CMS

Corresponding Author: mokhov@fnal.gov

LHC conditions : what can be expected and optimized / 35

Discussion

LHC conditions : what can be expected and optimized / 36

Discussion
