American particle and nuclear physics planning

Friday, 2 May 2014 15:00 (20 minutes)

In the United States the planning process relevant to future deep inelastic scattering involves both the high energy physics and nuclear physics funding and the two communities. Within the past two years there have been several planning initiatives and there may be more to come. I will review the current status of both the planning and the plans.

Presenter: MONTGOMERY, Hugh (JLAB)

Session Classification: Plenary
