

Input from WLCG Operations Coordination

Maria Girone, CERN-IT

Proposed Communication Model

- An internal discussion was held among the Operations Coordination and Commissioning Team on how to optimize the information flow with the Monitoring project
 - Aim is to make sure that sites are informed of the ongoing project activity and are represented
- The following proposal was discussed and approved at the Quarterly Planning Meeting (04.07.2013)
- An internal mailing list will be created within the Operations Coordination and Commissioning Team
 - open to site experts on Monitoring who want to provide “Input from Operations to Monitoring”.
- This e-group will be the forum of a bidirectional information exchange and will be moderated by Pepe Flix
 - We believe this will give the possibility to the Monitoring project to gather input from sites
- Pepe Flix will participate in the Monitoring Consolidation project from Operations Coordination as primary contact
 - Maria Girone will act as backup
