

RAW data processing

ALICE-LCG Task Force weekly

Current status

- Golden List: 67 runs (31 new runs)
- New RAW files: ~20K, production took 4 days
- New ML page (<http://pcalimonitor.cern.ch/production/raw.jsp>)
 - For some run (40876, 40874, 40366...), #chunks \neq than in the catalogue
 - Fixed percentages $> 100\%$ (overlaps of output dirs with/without tailing .root)
 - Logs too big (few MBs), decreased log level for some detectors
 - Runs with PMD and HMPID are failing, reco restarted with them off.
