

# Production status and first LHC beams

ALICE-LCG TF  
August 21, 2008

## VO-box migration

- Steady MC production, no problems to report
- Imminent – new First Physics production cycle with **AliRoot v4-14-Rev-04**
  - Will write out RAW data, substantial traffic sites -> CERN
  - 1.2 Mio events, should be ready within a week

# Running jobs profile

# Start of LHC

- Official start date (colliding beams)  
**10 September 2008**

Offline will perform from the very beginning all standard tasks:

- Registration of RAW on the Grid
- Conditions data gathering
- Replication CERN-T1s
- Pass one reconstruction
- Batch and CAF analysis

# Emphasis

- T0/T1 storage and CPU resources
- T2 storage and CPU resources for analysis
- There is no estimate on how much data will be actually collected, however
  - Time is of the essence – the pressure to get the first physics will be extremely high
  - All regional experts, please inform the sites!
  - The status will be discussed again next week
