

# AliEn update and redistribution

Pablo Saiz

# AliEn v2-15.45

- ▶ Version number
  - I686 → v2-15.45
  - X86\_64 → v2-15.47
  - Itanium → v2-15.48
- ▶ Backward compatible
- ▶ Changes:
  - Less database connections from the sites
  - Eliminate SE database
  - CE installs packages before sending JA
  - Retrieving different replicas from a file
    - Don't transfer anymore files through soap...
  - New options to jobListMatch
  - New 'SE views' of the catalogue

# How to install

- ▶ Execute:
  - `alien login --exec packman install psaiz@alien`
- ▶ Check the log files
  - `alien login --exec packman installLog psaiz@alien`
- ▶ If everything is ok,
  - Restart the services

Today we will update CERN  
Rest of the sites, please wait until tomorrow
