

The GRETINA science campaign at NSCL and FRIB status

Tuesday, 26 November 2013 14:00 (30 minutes)

The US gamma-ray tracking array GRETINA just completed its first science campaign at the NSCL(MSU). An overview will be presented, showing selected results covering broad topics from nuclear structure physics and nuclear astrophysics. A brief summary of the FRIB status will be given.

Presenter: GADE, Alexandra

Session Classification: Structure Medium Mass Nuclei
