perfSONAR deployment

- We would like to ask all WLCG sites to install/upgrade perfSONAR
 - Baseline release is 3.3.1
- Sites should
 - Follow instructions in twiki
 - <https://twiki.cern.ch/twiki/bin/view/LCG/PerfsonarDeployment>
 - Contact the regional PS deployment contact
 - Available in the Twiki
 - And/Or wlcg-ops-coord-tf-perfsonar@cern.ch
 - Do not forget to register the services in GOCDB/OIM

More details

- Central configuration has now been rationalized
 - Details in twiki
- We now run tests both within region and inter region
 - OWAMP within the region
 - OWAMP between T2s and T1s (inter region)
 - BWCTL within region (30 seconds every 6h)
 - BWCTL between T1s and T2s (inter region, 30 seconds every 12h)
 - BWCTL between all sites (30 seconds every week)
 - Traceroute between all sites (hourly)
 - Ping between all sites (every 20 minutes)

More details

- The new modular dashboard in improving
 - <http://perfsonar.racf.bnl.gov:8080/PsDisplay-1.0-SNAPSHOT/index.jsp>
 - New functionalities will go there
- Deployment status
 - <https://grid-deployment.web.cern.ch/grid-deployment/wlwg-ops/perfsonar/conf/monde/V11/>
- We will start submitting GGUS tickets to sites to better track the progress
