Gravitational Wave Detection: the Advanced Generation of Gravitational-Wave Detectors

Wednesday, April 9, 2014 9:55 AM (30 minutes)

This talk will cover the status of activities for the construction and commissioning of the imminent generation of the gravitational GW detectors due to start first science runs next year. It will focus on the status of and plans for the Advanced LIGO observatories (in Hanford Washington, and Livingston Louisiana, USA) and Advanced Virgo (near Cascina, Italy), and their operation in the global network.

Presenter: Prof. ROWAN, Sheila

Session Classification: Plenary 5

Track Classification: Particle Astrophysics, Current and Future
