JEDI monitoring plans

Artem Petrosyan
PanDA Workshop @ UTA, 04.09.2013

Framework

- Django
  - Python, any version
  - Framework, extendable
  - Various backends are supported
  - Multisite available on shared codebase
  - Management, deployment formalized and simple
  - Growing, lots of add-ons
  - Vast community

Principles

- Multisite application
  - Common templates, scripts, img, css
  - Navigation bar between sites
  - Sites as add-ons
  - Separated site-specific stuff

Infrastructure

- SVN:
  - Add folder pandaweb-django
  - Common in pandaweb-django/common (common templates, scripts, imgs, css)
  - JEDI: pandaweb-django/jedi
  - Networking: pandaweb-django/networking
  - …
- Development
  - Voatlas142, agreed with Sergei Baranov
- Deployment:
  - /data/atlpan/pandaweb-django/…

Issues and plan

- Issues
  - Common layout to be agreed (plan to use PanDA classic as inspiring basement)
- Plan
  - Networking page to be ready in to the next ATLAS S&C Week
  - Common layout – base approach to be done in a month in parallel with networking
  - JEDI monitoring draft to be ready to the next ATLAS S&C Week
