<i>R. A. Ryutin, Scientific Secretary</i>	<i>V. A. Petrov</i>
<i>S. V. Ivanov</i>	<i>A. M. Zaitsev</i>

General Information

[Institute for High Energy Physics](#) (in the framework of the National Research Centre "Kurchatov Institute") is organizing the XXX-th International Workshop on High Energy Physics "**Particle and Astroparticle Physics, Gravitation and Cosmology: Predictions, Observations and New Projects**", June 23-27, 2014, in Protvino, Moscow region, Russia.

The purpose of this Workshop is to exhibit a more complete and coherent picture of our understanding of the structure and dynamics of the microcosm, the megacosm and its evolution and the relationship between these two extremes of modern physics.

The Workshop covers both theory and experiment/observations in most actual and critical points.

We would like to promote, at the meeting, much more critical discussions than is usually the case. We strive to make the meeting not only informative but also to give it a truly working character with the aim to elaborate meaningful and clear conclusions about the actual state of affairs in the main areas of high-energy particle and astroparticle physics, gravitation and cosmology, with an emphasis on difficulties and unresolved problems.

To this end the meeting will be organized so that regular talks will be accompanied by discussion panels. The poster exhibition for brief actual notes is also envisaged.

Topics to discuss contain presumably *Higgs boson, hadron spectroscopy, heavy flavour physics, CP-violation, neutrino oscillations and the problem of neutrino mass, quark-gluon plasma and other exotic states of matter, QCD at short and large distances, astroparticle data from exploratory researches on dark matter, dark energy and black holes, early and present Universe, cosmic microwave background radiation, progress in experimental and accelerator techniques.*

We believe that such a relatively wide scope of subjects for presentation and discussion will be also a good opportunity for participants to learn first hands about the state of art in the fields of common interest where they are not experts.

Talks and panel discussions

Presentations are limited to 25 minutes for the talk proper with 4 additional minutes for discussion and 1 minute for transition to the next presentation and introduction of the next

speaker. Panel discussions usually take 45-60 minutes. We hope that panelists and moderators will be defined by the end of April, 2014. Suggestions are welcome. Instructions and proposals for speakers, chairs, panelists and moderators will be sent in advance.

CONFERENCE FEE

- 8000 Rub. (~ 200 Euro) for participants

- 5000 Rub. (~ 125 Euro) for accompanied persons

Includes visa payments, transportation from/to the airport, coffee breaks, conference dinner, welcome and farewell parties, complete set for the participant, publication of proceedings.

IMPORTANT DATES:

January 15, 2014 - start of the registration procedure and abstract submission

May 1, 2014 – registration deadline for those who needs Russian visa

May 15, 2014 - start of the presentation upload

June 5, 2014 - registration deadline for domestic participants

June 15, 2014 - end of the registration procedure and abstract submission

Since visa formalities may take a long time, please, try to send us the information as early as possible (it is better before April 15, 2014).

Please, send us the title of your talk (even if preliminary) before **June 15, 2014** and try to upload your presentation by the web interface (will be open after **January 15, 2014**) or send it by e-mail to Roman.Rioutine@cern.ch before **June 15, 2014**.

Please, inform organizers about any changes.

Participation

Participation is by invitation of the Organizing Committee.

In the case of a proactive request the decision is made by the selection committee.

About 80 scientists from Russia and other countries are expected to participate. The sessions will be held in the Conference Hall of the Theory Division Building.

The Proceedings of the Workshop will be published in the “World Scientific” Publishing Company.

Accommodation

The Workshop will be held in Protvino, a small town 100 km to the south of Moscow. The town is situated nearby the State Research Center of Russia—IHEP (Serpuukhov 76 GeV accelerator) inside a pine forest and near the Protva river.

The participants will be accommodated in the “Protva” hotel in single or double rooms. Prices for one night are from \$50 (1500 rubles) to \$100 (3000 rubles). The total living expenses (including breakfast, lunch, and dinner) will be about \$10-15 (350-500 rubles) a day. The participants can have their meal in the restaurant and snack-bar of the Hotel, in the restaurant of the Club of Scientists or in other restaurants of Protvino indicated in the map.

Transportation

All the participants will be transported from/to the Sheremetievo or Domodedovo airports by the IHEP transport or taxi. The information on flights or trains and the date of arrival should be communicated to the Scientific Secretary of the Organizing Committee a few days in advance.

Registration will be available on-line from
