

# XXX-th International Workshop on High Energy Physics “Particle and Astroparticle Physics, Gravitation and Cosmology: Predictions, Observations and New Projects”

## Tuesday 24 June 2014

### Diffraction physics - Conference Hall (09:00 - 13:25)

time	[id] title	presenter
09:00	[68] TOTEM results on elastic scattering and total cross-section	KASPAR, Jan
09:25	[17] Diffractive scattering in ATLAS	SIDOTI, Antonio
09:50	[19] CMS results on inelastic and diffractive cross sections	Mr SOBOL, Andrei
10:15	Coffee break	
10:35	[82] Diffraction physics with ALICE at the LHC	EVDOKIMOV, Sergey
11:00	[18] Exclusive and Inclusive quarkonia production in the forward acceptance at the LHC	BLOUW, Johan
11:25	[20] Low-x and Diffraction at HERA	VALKAROVA, Alice
11:50	[21] Vector meson production in ultra-peripheral pp, pA and aa collisions at the LHC	Prof. JENKOVSKY, Laszlo
12:15	[73] The interaction region of high energy protons	DREMIN, Igor
12:40	[22] Panel discussion on Diffraction
